Software Engineer | Full-Stack Developer

I'm a full stack developer with a knack for organization, leadership, and expediency. Having been a founder of a startup, I have an affinity for creating impactful systems that solve nuanced problems. This translates into effective top-down software creation. Allocating resources, organizing operations, managing time efficiently, adapting to unforeseen circumstances - these are the weapons of entrepreneurs and developers alike.

TECHNICAL SKILLS

LANGUAGES: HTML5, CSS, Javascript, Python
Libraries/Frameworks: MEN Stack(Mongoose/MongoDB, Express.js, Node.js), Jest, Passport, Django
Databases: Postgres, MongoDB
